

EU 50th Anniversary: Background

PlanktonNet investigators have established a [special collection](#) of image material to mark the 50th anniversary of the Roman treaties which formed the foundation of the EWG and therefore the EU. For this special collection we have assembled a list of 50 different plankton species, with each of the 50 species having been described in one of the past 50 years where possible from a European taxonomists. All partners in the PLANKTON*NET EU project have participated in the assembly of this set of images which includes diatoms, dinoflagellates, coccolithophores and picoplanktonic flagellates (see [10013/de.awi.planktonnet.set.495](#))
