

How to get started

Individual researchers, institutions or research centres willing to (a) share plankton-related data with us as external contributors or (b) set their own local PlanktonNet repository with **biodivDP** are encouraged to contact the project coordinator. For more details on **biodivDP**, visit our open access pages.

Becoming an OAI-PMH data provider

Any OAI-PMH compliant data providers willing to accept the term listed under our [data policies](#) are welcome to become part of the pool of harvested repositories in the PlanktonNet network. We encourage you to fill out the "[Register URL](#)" form available in our data portal so as to allow the harvesting process from our OAI service provider to take place daily.
