

PLANKTON*NET - a global plankton resource

Our goal is to create of a low barrier framework for publishing quality-controlled information on the taxonomy and ecology of plankton

The PLANKTON*NET projects started as a collaboration with the MBL Woods Hole in 2004. The focus was then broadened through funding under the [Sixth EU Framework Programme](#). PLANKTON*NET contains records of thousands of species of phyto- and zooplankton. In addition, PLANKTON*NET records are cross-referenced with environmental data archived in [WDC-MARE/PANGAEA](#) and various publication repositories. Read [more](#)
